Cable Storage Device 管線收納裝置

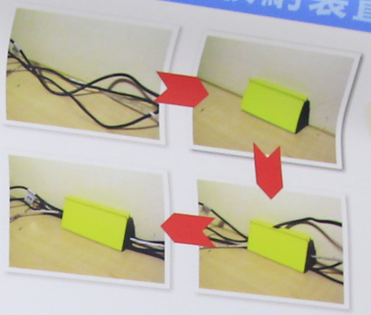
ANGLED

Design creativity roots in our daily life. It's all about a simple move, which solves a problem. To come out with solutions which bring convenience in our life, that's product design!

Nowadays, technology has become big part of our life. More and more electrical wires needed to be installed in our home or office. Electrical wiring is complicated and potentially life-threatening if we do not handle it well. Therefore, it has become important that we need an efficient solution to store our cables.

Cable Storage Device is created to ease storage of cables and save space. Wires can be easily pulled out and stored back. The problem of wire tangling can be solved without coiling it and damaging the cord. This user friendly device can be easily operated by single-handed. Hence, It is convenient for people with disabilities.

Cable Storage Device is designed and built in three-dimensional right angle triangle. It can easily fit in the edge between the walls where we have a lot of wires hanging around.It saves space as you can stick it to any corner.



Design Feature
Ease storage and save space
Easily operated
Stick it to any corner

Tendency
User-friendly Futurity
