DUSTPAN

Patent

Taiwan : 100203710

Content

This is a new concept of the dustpan. The product uses the shape of the funnel and then adding it in the back of the dustpan. The device requires a cover to prevent the garbage from falling out. Besides, it has a bottom on the handle of the dustpan so when you finish your housework, simply pressing the bottom and then the dustpan's cover will open. You don't need to turn dustpan you can put garbage out into the trash easily when you clean your house.

Characteristic

Clean

This product can make people throw the garbage correctly and keep house clean.

Easy use

A bottom set on the handle of the dustpan so when people finish their housework, simply pressing the bottom and then the
