

## Rolling Roll Mouse Trap

Rolling Roll Mouse Trap provides a smarter way of dealing with the mouse problem. This design thinks more about its users and our earth.

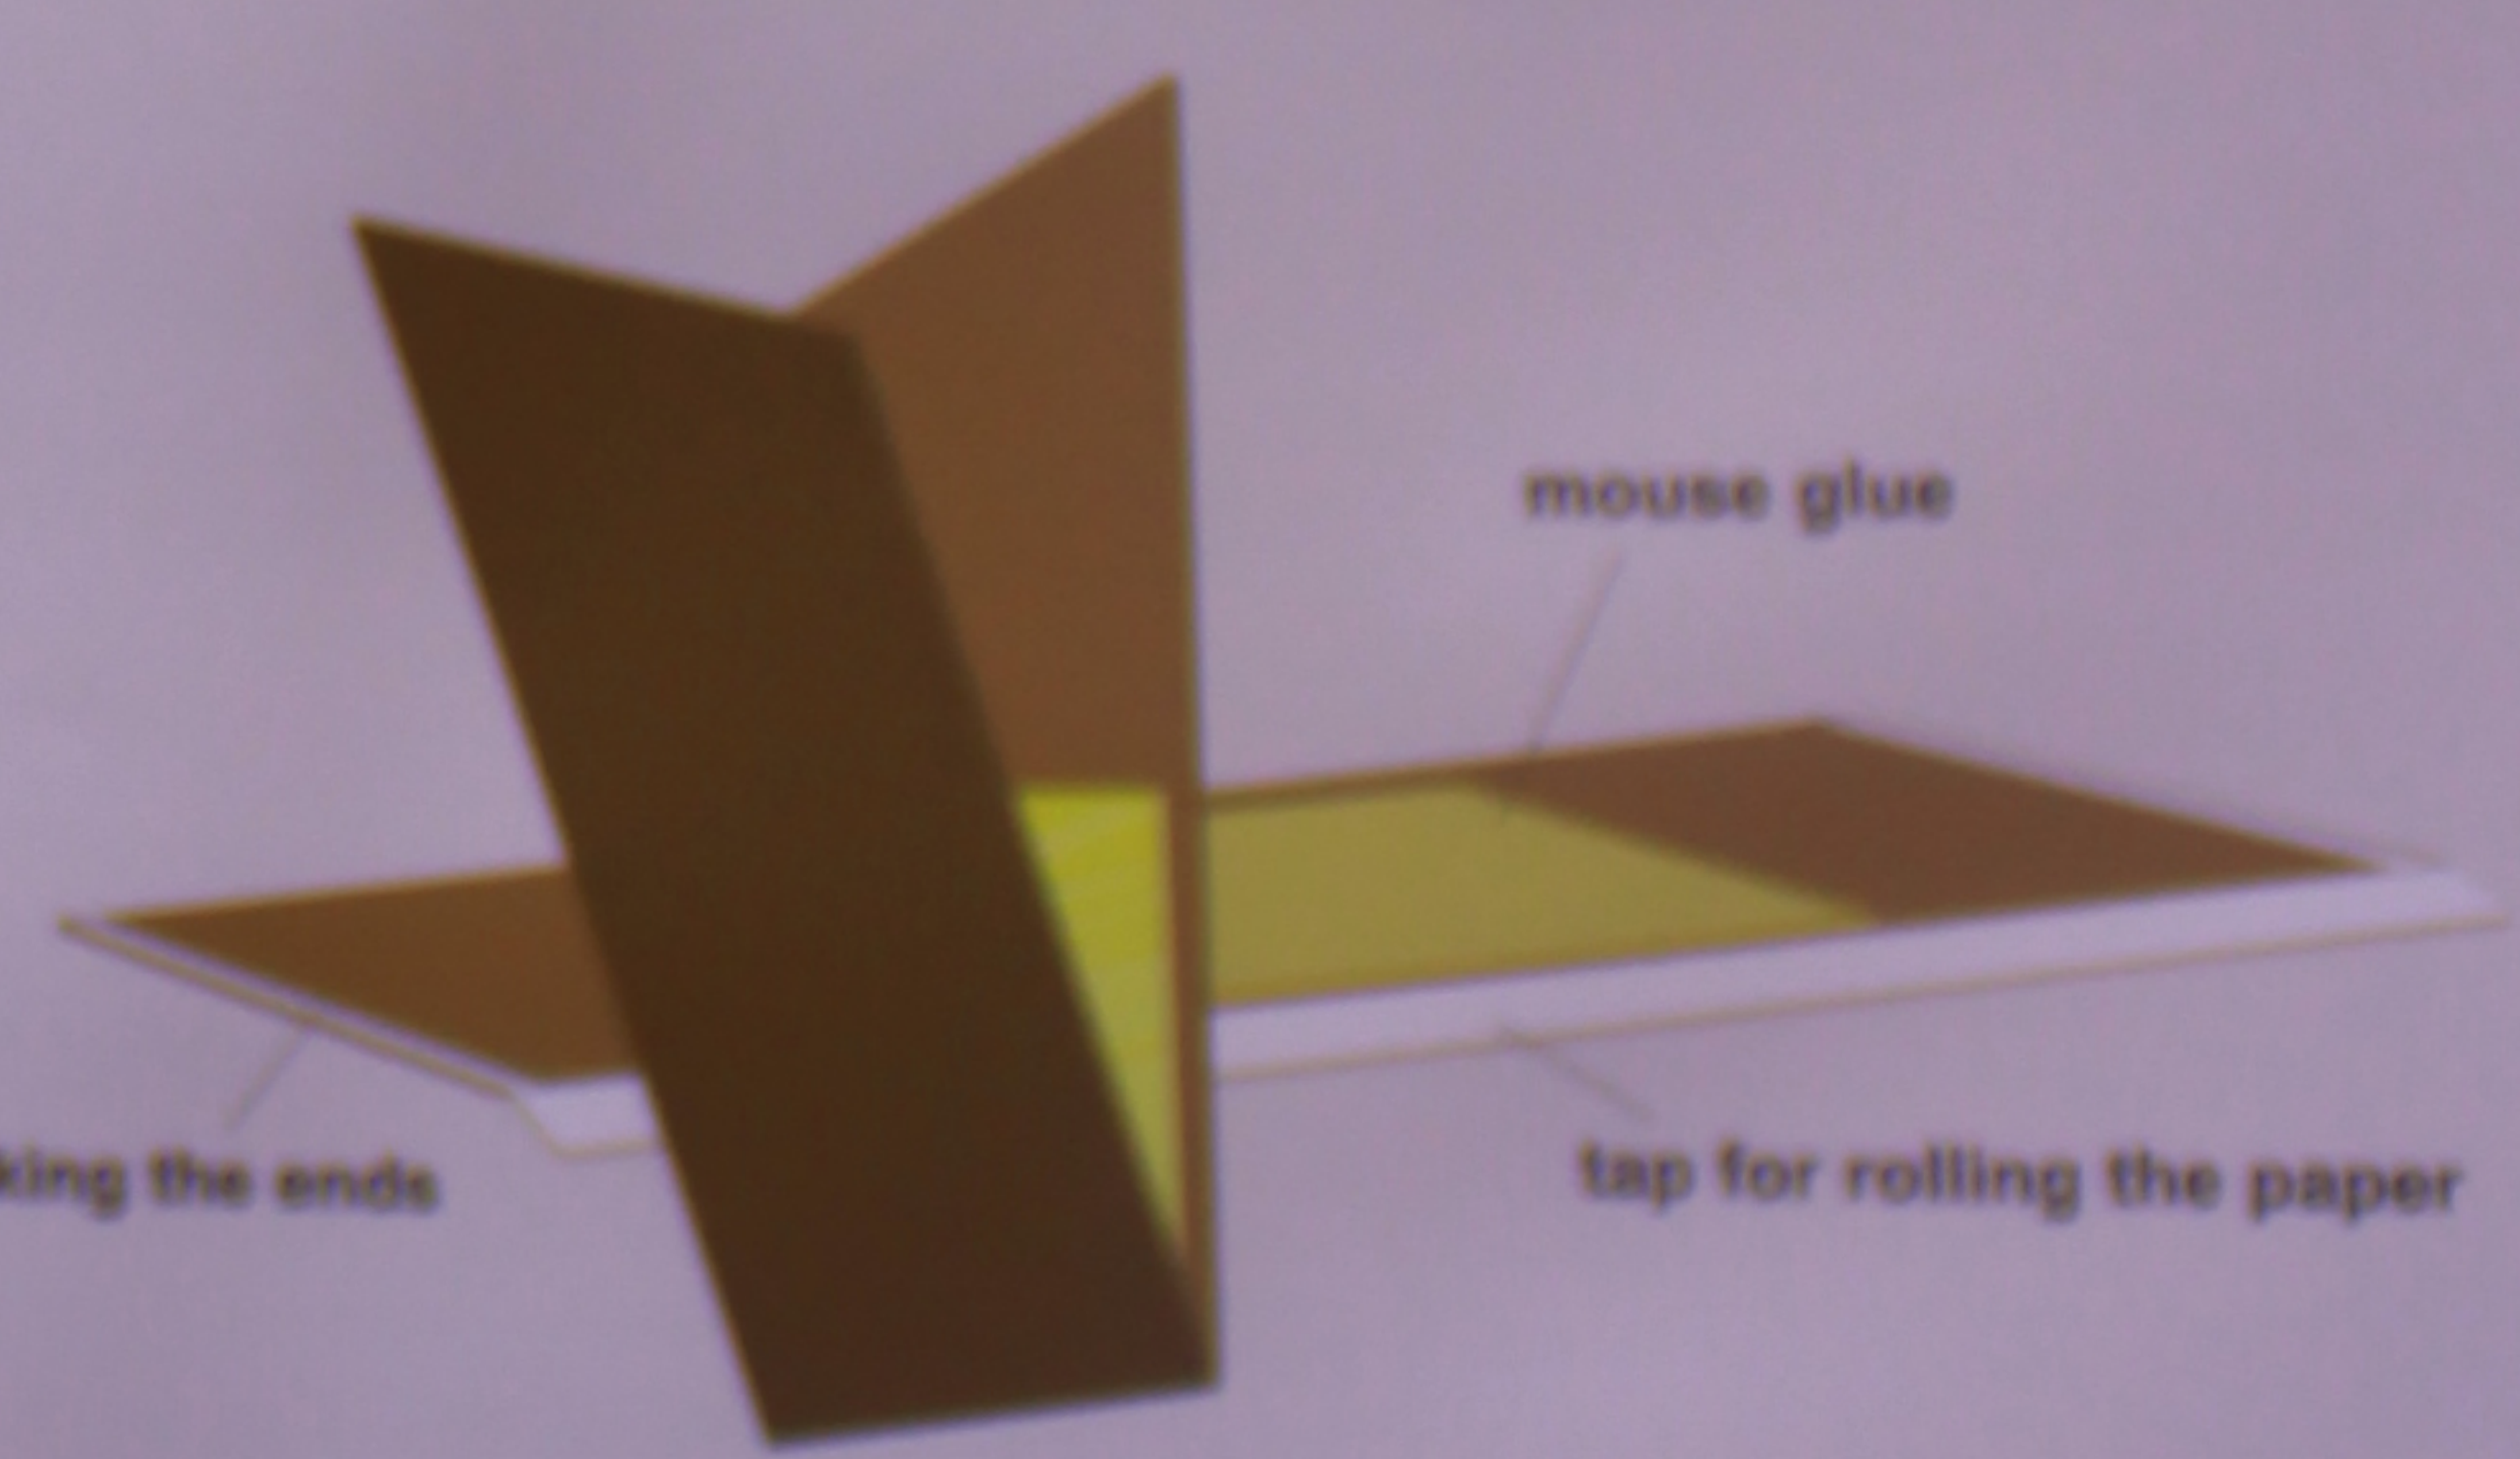

Rolling Roll Mouse Trap combines both benefits of traditional mouse trap station (made by plastic or metal) and mouse glue board :

- Mouse will not be killed once it stuck on the trap.
- The tube form helps users with avoiding the terrified experience of watching a mouse scurries on a piece of board.
- Lockable tube provides its users a safe and clean environment by block the mess caused by mouse.
- Paper made trap is easy for carry, produce, and moreover, it could be dispersed by earth.
- With a special smell, attract pests (such as flies, mosquitoes, etc.) into.

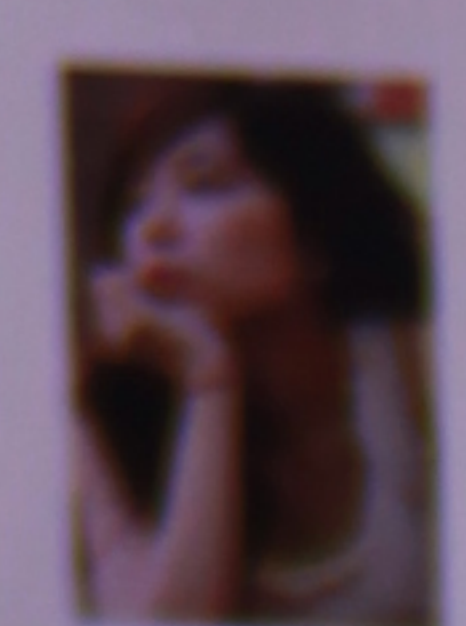

### How to use

- 1- Trap is folded to protect the glue.
- 2- Open the trap paper. Rolling the paper according to the instruction.
- 3- Once the mouse stuck on, simply fold both sides of the tube with the tape on the trap.
