

# Secure tack

Normally, it is easy to get hurt while using the tack. Traditional one exposes the needle outside and the user. However, the new design of the secure tack has the needle retracted when it is not used and reduces the risk of using it.

Sharp needle, and it is easy to hurt people. The concept of hiding the needle is convenient and safe. The product uses simple needs. The user will turn it clockwise to use it. After use, they can easily put it back when finished.
