

Washbasin

CONTENT

Big washbasin is a common washing tool for Taiwanese, especially women. It is hard to control when the it is filled with water and clothes, sometime it will become so heavy that people might hurt their hands and joints when trying to pour the water.

However, this reformed design can solve this problem by adding a small gate to the washbasin so that the user does not need to lean to pour the water. This design can be used in all-purpose.

Purpose

- Pour water out Easily
- Prevent hurt user hands and joints
- To use the old to add device
- Multiple use
- Not be dirty
