Synergy cup

Contents

In the winter, people like to make hot tea, however, it is not easy to finish it at once. However, we do not know the drink is already cold. Therefore, this new design contains the temperature display function that can avoid above problem. Furthermore, this Cup also take weight of the contents into account. There are two handles designed in this cup, one fixed and the other is active. When it weighs heavily or loading hot drinks, the handles can be separated into two parts.
